

University of Utah
Division of Plastic Surgery
Gender Affirming Surgery Policy

The Division of Plastic Surgery performs Gender Affirming Surgery (GAS) as part of the University of Utah's Transgender Health Program. The surgeries offered include masculinizing chest surgery, breast augmentation, vaginoplasty, metoidioplasty, phalloplasty, body contouring, and facial feminization. During a number of your rotations, specifically with Dr. Cori Agarwal, Dr. Courtney Crombie, Dr. Isak Goodwin, Dr. Dana Johns, and Dr. Erinn Kim you will be caring for these patients. If you are not planning to participate in these surgeries, please discuss this with the Program Director know and he will rearrange your operative schedule accordingly. You will still be expected to care for the patients before and after surgery.
